Professional Summary:

Data Analyst with hands-on experience in data cleaning, analysis, visualization, and business reporting using Excel, SQL, Python, and Power BI. Skilled in developing interactive dashboards, tracking KPIs, and transforming data into actionable insights to support data-driven decision-making. Strong analytical, problem-solving, communication, and reporting skills with a business-focused approach.

Skills:

Technical / Tools: Excel (PivotTables, Power Query, XLOOKUP, Data Cleaning) | Power BI (DAX, KPIs, Dashboards, Data Visualization) | SQL | Python (pandas, NumPy, scikit-learn) | Data Analysis | EDA | Data Cleaning & Preprocessing | Reporting & Visualization

Business / Soft Skills: Analytical & Problem-Solving Skills | KPI Tracking & Reporting | Data-driven Decision Support | Communication & Presentation Skills | Teamwork & Collaboration

Experience:

Data Analyst – Freelancer | Jun 2024 – Present

- *Delivered 10+ data analysis projects for small businesses using Excel, Power BI, and Python.*
- *Built interactive Power BI dashboards to track KPIs, analyze performance, and support data-driven business decisions.*
- *Cleaned, transformed, and analyzed datasets to identify trends, performance gaps, and actionable insights.*
- *Automated data reporting processes, reducing manual effort by up to 70%.*
- *Performed exploratory data analysis (EDA) and prepared clear reports and visualizations to communicate key findings.*

Payroll Analyst Intern – GBE | Apr 2026

- *Analyzed payroll data and monitored key indicators including accuracy, processing time, and compliance.*
- *Automated an Excel-based payroll review process using Python, reducing processing time from 15 minutes to 2 minutes (~87% improvement).*
- *Applied data cleaning and validation techniques to improve the accuracy and efficiency of payroll data processing.*

Data Analyst Intern – National Telecommunication Institute (NTI) | Oct 2025 – Dec 2025

- Completed hands-on data analysis training focused on data cleaning, exploratory data analysis, visualization, and business-driven insights.
- Used Excel, SQL, and Power BI to prepare datasets, build interactive dashboards, and extract actionable insights.
- Analyzed data and presented findings to support data-driven decision-making and communicate insights effectively.

Freelance Data Analysis Coach – Freelance Yard | Apr 2026 – Present

- Mentor and train a cohort of 66 students in Data Analysis and freelancing, covering Excel, Power BI, SQL, and Python.
- Provide practical guidance on project execution, portfolio development, client communication, and presenting analytical solutions.

Projects:

Superstore Dashboard – Business Insights

- Built an interactive Excel dashboard analyzing sales, profit, geographic performance, customer segments, and product categories.
- Analyzed KPIs and business trends to identify high-value markets, top-performing products, and areas for performance improvement.
- Transformed raw sales data into actionable insights to support data-driven business decisions.

Startups – Machine Learning & Data Analysis

- Analyzed startup investment data to identify factors influencing profitability across R&D, administration, marketing spend, and location.
- Built a machine learning pipeline including data preprocessing, imputation, feature encoding, and scaling.
- Evaluated model results and translated findings into actionable business recommendations.

Education:

B.Sc. in Data Science

Faculty of Computers and Data Science, Alexandria University | 2022 – 2026

Languages: Arabic (Native) | English (Intermediate)
